

The future boat station in the "Agala (The Corner / Ъгъла)" area may be part of the "Smart suburban island"

Tuesday, 16 February 2021

The Municipality of Burgas is moving forward with ensuring project readiness to apply for a European funding under the measure of "Fishing ports, unloading berths, fish exchanges and covered by boat". As a place for the construction of a future new object of this kind was chosen the area "Agala (The Corner / Ъгъла)" in Sarafovo. In the next decades in this area is expected a new residential area of Burgas to emerge, which can become part of the general concept of sea taxis proposed by Mayor Dimitar Nikolov – small vessels for transporting residents and tourists to different points in the Burgas Bay.
