

The area around bl. 62-64 is being improved due to the "My city, my district, my street" program

Tuesday, 2 March 2021

The construction work on the improvement of the space near two high residential blocks in the "Izgrev" living area has begun. This is one of the quick and well-reasoned projects, presented last year under the new program of the municipality "My city, my district, my street". The residents of bl. 62-64 asked for a good and large parking lot, sidewalks, new lighting and landscaping and they will get it.
