

## **Burgas presents its experience in the application of modern solutions for the development of the urban environment**

Tuesday, 23 March 2021

Burgas presented its experience and work on projects in the field of urban development and the application of modern technologies in various spheres of life during the “Knowledge City” conference. The event discussed good practices from different European cities that have proven to be successful models for solving various problems. Deputy Mayor Vesna Baltina presented to the participants of the event the guidelines in which the Municipality of Burgas is working to create a modern urban environment, giving the example that 50 charging stations for electric cars are being built in the seaside city according to the project of the administration and a private company.
