

Burgas School participates in the development of an innovative educational mobile game that develops skills in children

Wednesday, 10 March 2021

Students from 4th and 5th grade from the innovative Burgas school "Alexander Georgiev-Kodzhakafaliyata" participated in the development of the first educational mobile game that develops soft skills in children. Through the game model, it stimulates critical thinking, teamwork, creativity, and leadership in adolescents. The students from Alexander Georgiev-Kodzhakafaliyata Primary School were the first to test the game and give their recommendations for its finalization.
