

Until the end of March, "Demokratsia" boulevard and "Hristo Botev" street will have updated street lighting

Tuesday, 16 March 2021

The modernization of street lighting in 22 zones of Burgas starts from "Hristo Botev" street and "Demokratsia" boulevard, where new poles were also erected with major repairs. They will be ready by the end of March. The modernization of street lighting takes place after the approved project of the Municipality of Burgas, which received funding under the program "Renewable energy, energy efficiency, energy security" and with its implementation, a total of 2,623 lighting devices are expected to be replaced.
