

TWO PROJECTS BY THE BURGAS MUNICIPALITY COMPETE FOR BUILDING OF THE YEAR

Monday, 2 December 2024

Two projects from the Municipality of Burgas are competing for the prestigious "Building of the Year" 2024 awards. These are the restoration of the "St. Cyril and Methodius" Church and the "Fisherman's Stories" children's playground in the cultural and tourist complex "Chengene Skele."

The restoration of the Burgas church is nominated in the category "Projects related to the development of cities." The restoration of the facade is a true technological, organizational, and sculptural challenge of the highest order.

Although the restoration task was initially planned as a construction project, it has become primarily an artistic one, on a scale that has not been achieved in Bulgaria before. If you would like to support the project, you can vote at the following link: [Conservation and restoration of the "St. Cyril and Methodius" Church](#).

Also competing in the same category is the children's playground built in the "Chengene Skele" cultural and tourist complex.

"Fisherman's Stories" is an educational children's playground focused on promoting the fishing craft and raising awareness on topics such as ecology, environmental protection, water, and the flora and fauna of the Black Sea.

It includes different types of zones: a square area with seating and educational materials, a sensory section (including water play and a sensory path), a playground for children aged 0-3, and play areas for children aged 3-7 and 3-12 years.

The equipment is made of acacia wood, according to an original design inspired by the location and the themes of the playground. If you want to support the team that created the playground, you can do so here: ["Fisherman's Stories" - children's playground](#).

The "Building of the Year" 2024 competition is held under the patronage of the Ministry of Regional Development and Public Works and is one of the most popular and prestigious events in the field of investment projects, construction, and architecture. It is organized by the GRAAD Media Group.
