

The new parking with a hundred spaces near blocks 76-80 in “Meden Rudnik” is ready

Thursday, 4 March 2021

The construction of the new parking lot for 100 cars near blocks 76-80 in "Meden Rudnik" has been completed. Years ago, illegal metal garage cells were indiscriminately placed in the same place. Along with the parking spaces, sidewalks and approaches to the apartment blocks have been completed so that people do not step on mud in wet weather.

The project was implemented after an explicit wish by the residents of the area and application under the new municipal program "My city, my neighborhood, my street".
