

## Between blocks 39 and 40 in "Izgrevev" there's a new playground

Monday, 29 March 2021

Currently, the play equipment is being installed on a new playground between blocks 39 and 40 in the Izgrevev complex. There are also benches for parents, grandparents to rest on them and look after their heirs. By the end of this week, everything should be ready and the use of the new site should be allowed.

In the immediate vicinity, between blocks 38 and 39, construction of a parking lot for 100 cars has started. There will be new lighting and alley network with approaches to the entrances of the blocks. The existing vegetation is preserved as much as possible.

The Municipality of Burgas is fulfilling these commitments after a project submitted by the residents of the region, coordinated and approved under the program "My city, my neighborhood, my street".
