

A snapshot of the next favourite place for rest and jolly in Burgas

Thursday, 11 February 2021

The construction activities for building a cultural-historical complex and a boat dock in the Burgas park "Rosenec", in a close proximity to the fishing village Chengene skele, are reaching a final phase. The leading infrastructure is already being worked on. The new road leading there will end with a parking lot for around 50 automobiles. A barbecue zone will be constructed close by, and the pretty beach to the right of the new boat dock can be visited by anyone who wishes to do so.
