

22 ZONES IN BURGAS WILL HAVE ENERGY SAVING STREET LIGHTING INSTALLED

Thursday, 18 February 2021

Burgas is making yet another important step on the road to realizing its policy for energy efficiency with modernization of street lighting. A total of 2623 lights will be upgraded, which will contribute to the reduction of harmful emissions of carbon dioxide and reduce the energy consumption which will in turn save on financial costs. Not only that, but the better lighting will raise the safety of street traffic and safety of the citizens.
