

More than 400 people already use the Transport Burgas mobile application, take advantage of it

Saturday, 24 April 2021

On March 25 this year the mobile application Transport Burgas was activated, with which the residents and guests of the city have access to real-time information about the movement of buses and trolleybuses. It also gives the ability to charge electronic travel products in a plastic card. This is a convenient alternative for citizens who want to load their travel cards faster and without additional time. The advantage of using the mobile application in the face of constraints during the current Covid-19 pandemic is also obvious.
