

## **The Municipality of Burgas provides pellets to citizens who have replaced the old wood-burning stoves under the project for fresh air**

Tuesday, 23 March 2021

The Municipality of Burgas provides pellets to citizens who have received new heating devices of this type of fuel under the project of replacing old stoves under the "LIFE" program. 66 families will receive 60 kilograms of ecological fuel free of charge. Today, teams of the municipality delivered pellets to the homes of the people, who have registered the earliest and subsequently approved residents under the program.
