

## **Municipality of Burgas is looking for a manager of the Cultural and Tourist Complex "Chengene Scaffolding"**

Wednesday, 26 May 2021

Simultaneously with the efforts for preservation of the fishing village Chengene scaffolding, together with the way of life and livelihood of its inhabitants, the Municipality of Burgas built in the immediate vicinity a new tourist attraction. There are the last finishing works on the ethnographic complex with exhibition areas and a small amphitheater for cultural events. A new protected boat dock has been built, which tourists will be able to reach with a new, second own boat of the Municipality. Years ago we were looking for a governor on the island of St. Anastasia. And we found him in the face of Pavlin Dimitrov. Now we need an equally inspired person with energy and ideas to manage and develop the Chengene Scaffolding Cultural and Tourist Complex in the coming years.
