

## **ESO WILL REMOVE SINGLE TREES IN BURGAS, VIOLATING THE EASEMENT OF THE ELECTRICITY TRANSMISSION NETWORK**

Monday, 21 February 2022

The Electricity System Operator informed the Municipality of Burgas that it is necessary to clean single trees and shrubs located near power transmission facilities in the city. The law obliges the institutions to take action in this direction when necessary. Thus, the removal of such trees and shrubs, which pose a potential danger to the trouble-free operation of power lines, as well as to human safety, will take place. The implementation of the task is a commitment of ESO. In the attachments you will see the places where the teams will work.
