Burgasbus LTD announced that from November 12th, all residents and guests of Burgas can use the Internet platform [www.a2b.burgasbus.com](http://www.a2b.burgasbus.com). It provides real-time access to useful information about public transport via electronic devices running Android and Windows.

This way, on your mobile phone, you can now set up a desired route, track the running lines and passing through the bus stops vehicles, and also the location of the buses and trolley buses of Burgasbus LTD.

On the electronic boards on the bus stops you can see information when the next bus comes. The new app

allows you to track up to three more buses after it on the route.
