

There will be free screenings for macular degeneration at Oxycom Medical Center for a whole month

Wednesday, 12 May 2021

Driven by its desire to provide citizens of Burgas with access to the best eye health care, the team of MC "Oxycom" again organizes free screening for a disease that can lead to serious consequences.

The health institution announced that in the period May 17 - June 17 they will conduct a campaign with free screenings for macular degeneration. It is recommended that people over the age of 50 who have reduced vision, visual defects, image distortion, and other disturbing symptoms take advantage of the initiative. Gifts are also provided for all patients.
