

Students from ELS “Geo Milev” have successfully finished their first Japanese language and culture course

Friday, 9 April 2021

An online event marked the end of the pilot course in Japanese language and culture at EIS "Geo Milev".

Thanks to the collaboration with The Japan Foundation for three months - from December to March, students of different grades had the opportunity to touch the language and culture of Japan, as well as to expand their knowledge in the field of linguistics by comparing phonetic, graphic, lexical layers in the eastern and western languages, which they study as a profile.
