

## **THEY RETURNED A ROMA KATUN BACK TO HIS HOMETLAND AND DISMANTLED HIS CAMP**

Thursday, 2 December 2021

The Municipality of Burgas cleans the same area near the Slaveykov complex several times a year. Roma katuns from other settlements are persistently trying to colonize it. But there is a railway line where years ago a train killed their 2-year-old child, left unattended. The dumps that form near these bivouacs are disgusting.

So the Municipality of Burgas will continue to prevent the settlement of vagrant groups. It already has an algorithm for action in such cases, which was implemented today.

The uninvited guests, 11 in number, were taken by bus to their native Sliven. In these actions the Municipality always receives competent assistance from the Police.

The makeshift shelters and tents have been removed. The place was cleaned, and Nelsen Burgas exported 10 tons of waste.
