

See the history of the Bulgarian Cosmonautics in the Aviation museum - Burgas

Thursday, 22 April 2021

The history of the Bulgarian contribution in the research of the Cosmos is filled with curious facts and discoveries. If you wish to track the first steps of the familiarization with the endless space, visit the Aviation museum - Burgas. The photo exhibition "Bulgaria and the Cosmos", presented by the Aviation Museum in Krumovo, is visiting there.

In 20 canvases are collected photos and information about the research of Space. The exposition presents moments of the work of the two Bulgarian astronauts Georgi Ivanov and Aleksandar Aleksandrov. A special place is reserved for the contribution of our country and the Bulgarian Academy of Sciences in the development of space food.
